

# 4.1/16” Flange handling tool

The flange handling tool is designed for two flange dimensions: 4.1/16”-5K and 4.1/16”-10K.

The tool is useable as a hoisting device for flanges (mentioned above) to guarantee a save mount or dismount from the tree.

It is easy to use, the flange is clamped between the four rotary knobs tighten by hand and the crane can lift the tool with the flange.

### Technical specs Flange handling tool

- WLL : 250 kg
- Reach : 4.1/16”-5K  
: 4.1/16”-10K
- Weight : 25 kg
- Dimensions : outer diameter 366mm  
: height 270mm
- Certified according : AI 17
- Year of Construction : 2009

Lifting position 45 degrees
