

Mission Statement

Bakker Oilfield Supply Coevorden B.V. (B.O.S.) offers a selection of products and services to companies mainly active in the energy industry, enabling clients to focus on their core business

Vision Statement

B.O.S. knows its customers; they can count on years of experience, reliability and professionalism. B.O.S. operates according to the highest safety requirements and aims at innovation and sustainability. B.O.S. stands for high quality of its products and services. B.O.S. makes an important contribution to the energy transition.

Bakker Oilfield Supply is a Bakker Groep Coevorden company. Since 1948 the company has been based in Coevorden, The Netherlands.

In 1943 the first oilfield was discovered in Schoonebeek and in 1948 the first gas field in Coevorden, The Netherlands. In the following years more and more relatively small gas fields were found. In 1959 the famous 'Groninger-Gasveld' started to be exploited. At that time Bakker Oilfield Supply was growing steadily and in 1991 Bakker Oilfield Supply took over the company 'P. Boer & Zn.' which has developed and exploited the Sound Wall system.

Bakker Oilfield Supply is now the main rental supplier of Sound Wall systems and is also a supplier for renting out and sales of equipment, maintenance and inspections.

Sales

We also sell new equipment. Bakker Oilfield Supply offers various products for many applications in the oil, gas and geothermal industry, such as a wide range of flow-line products, spare parts, flanges and crossovers. Some of the items can be custom-made, others simply supplied from stock. In our program you can find flow-line products and additional spare parts for the most popular brands in Europe.

Maintenance and Inspection

Bakker Oilfield Supply takes care of your total equipment management, including maintenance, storage, logistics, certification and administrative processing. You can simply call off your equipment and we'll ensure that all items, fully operational and provided with all required certificates are ready for collection, or will be delivered to the location if required. Do you need our assistance during the rig-up activities or operations? We can also assist you with that.

We offer inspections and support in our workshop, on site or on your location.

Projects

We offer bespoke project management solutions for your particular needs. Together we assess the project and work out the best possible project management for your job. Our employees are able to perfectly manage your project or parts of it and besides that, to control the processes and quality. You can stay focused on your core business!

Our experienced and competent personnel can support you with all your activities on site. The quality of our crew is guaranteed by a competence management system, which enables us to provide you with the right person for the job, at all times.

Bakker Event Services

The Sound Wall System is a unique Bakker Groep Coevorden Rental Item and indispensable for the event industry. Bakker Event Services is a division of Bakker Groep Coevorden and specifically focuses on the event industry. The 10 meter high Sound Wall can be installed at events and festivals to reduce the noise level. The Sound Wall has a height of 10 meters and ballast blocks of approximately 10.000kg. With this Sound Wall you can also create a secure environment for the visitors. In any situation where noise reduction is required we can offer a complete full service solution.

Bakker Geothermal Services

For many years Bakker Oilfield Supply has been providing services to the oil and gas industry. Since 2009, we have also been developing our offer relating to well service activities in the geothermal industry. Since the initial stages of the development of geothermal energy in the Netherlands, we have been involved in the activities on site. Through our years of experience in the oil, gas and geothermal industry we have advanced to a full service provider.

Geothermal well services, clean outs, production tests, injection tests, support during well stimulation operations, project support, rental and sales of equipment.
